

CLIR® RGB

HIGH PERFORMANCE LED SYSTEM

TENCATE

Elevate the fan experience with state-of-the-art CLIR® RGB. This unique fixture offers capabilities to use full-spectrum color flooding and custom stadium effects. The possibilities for entertainment are endless; from community events, sports games, halftime shows, and post-game celebrations, our color enhancements with music synchronization capabilities make for an unforgettable experience.

CLIR® RGB

HIGH PERFORMANCE LED SYSTEM

We offer pre programmed effects, or you can work with Hellas design engineers to create custom effects and scenes specific to your venue. We provide a touchscreen stadium software package to ensure effortless operation. Venues that have an existing DMX system will become a fully integrated extension of the Hellas system.
